## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group II, claims 2-9 in the reply filed on 16 August 2004 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner to search both groups. This is not found persuasive because the method claims state a specific process (ALD) which is key to forming a dielectric layer, and the product claim states only the material of the dielectric layer.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maiti et al. US 6,020,024.

Maiti et al. discloses a process of forming gate dielectric including forming a calcium oxide layer on a wafer as the gate dielectric and that the calcium oxide layer may be formed using atomic layer deposition (see figs. 1-2 and related text)

Maiti et al. does not disclose the specific steps involved in the formation of the calcium oxide layer by ALD.

However, Maiti et al. does disclose that ALD can be used in the formation of the gate dielectric (col. 3, lines 52-63). Therefore, it would have been obvious to one of

Art Unit: 2822

ordinary skill in the art to form a gate dielectric using ALD and including the various steps because they would have been known in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
